Subject: RE: Questions from meeting

Hello Anna,

It was my pleasure talking with you.

You are correct we are in negotiations with CFAC in regards to the Administrative Order of Consent (AOC) and to move forward with the review CFAC's contractors proposed work plan for the Remedial Investigation/Feasibility Study (RI/FS). That continues to move in a positive direction. Once we have a signed an agreement, we will continue to move forward with physical work and document review, interviews and so on.

The work plan review is in progress but it is a rather large document and I am getting some assistance with that review as well so we can be sure Columbia Falls is getting a good product.

The 4 year schedule is not uncommon for this type of work, but we will have a better handle on this once we get into the work plan procedures. At this stage most of the work is for site characterization and which will help guide us to the actual physical work that will be considered a remedy.

I will not be at next month's meeting and will be unavailable from Sept. 2 through the 18th, but feel free to contact me before or after that. I am around tomorrow if you would like to have some further discussions.

I have copied Cynthia Peterson on this email response. She is our community involvement coordinator and she can help get you while I'm unavailable.

Thanks
Mike

Hi Mike,

Thank you for your time yesterday.
The last 24 hours have been a whirlwind, if I forget something we spoke about or I miss pertinent points, please let me know.
Right now you are in the AOC process and once that is finished and signed, then work can begin based on that agreement. i.e., contacting past employees to map out areas of contamination.
Currently things are moving at a nice pace in terms of negotiations. Should this momentum continue and agreement be signed, work will be on schedule.
The 4 year calendar is a reasonable calendar for slated testing and work.

I have a couple of other questions I'd like to ask you in person but I will wait until I hear back from you as to not waste too much of your time, should we need to discuss the above.
Again, I really appreciate your communication and hard work.

Sincerely,
Anna

Anna Stene
